

# The New 4G Wireless Network

Your trusted and reliable network just got better.

## Faster Data Speeds

Download content at speeds up to 21 Mbps\*

Upload content at speeds up to 5.76 Mbps.\*

## Simultaneous Voice and Data

- Talk and Surf at the same time.

## Trusted and Reliable Coverage

- Voice and High Speed Data coverage to 97% of the Manitoba population
- Excellent voice and data coverage throughout Canada and the U.S.
- Enhanced International Roaming to over 200 countries worldwide

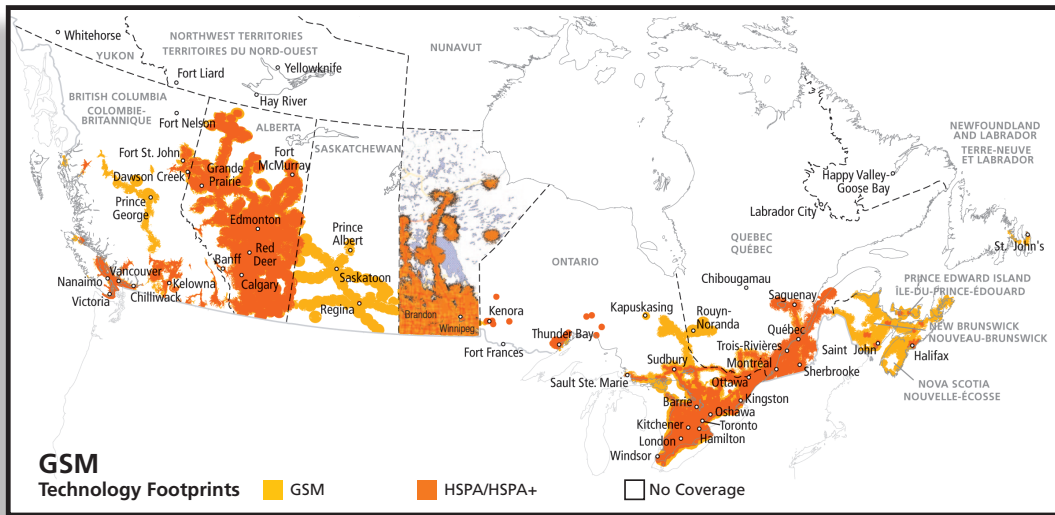

The new 4G Wireless Network delivers faster network speeds and enhanced coverage while travelling outside of North America. If you like to stream videos on your smartphone, rely on advanced applications, or do a lot of travelling, then this is the network you've been waiting for!

For more information please visit [mts.ca/4g](http://mts.ca/4g)

\* Data speeds are impacted by: traffic on the network, and device capabilities. The maximum theoretical speed of our 4G Wireless Network is ~ 7x faster than our EVDO network. However, most HSPA handsets manufactured today support between 1-7 Mbps. Today's HSPA+ Internet Sticks are the exception, and can support up to 21 Mbps. Many factors affect speeds; actual speeds may vary and are not guaranteed. Speeds are based on manufacturer information and reflect the maximum speeds that can be achieved under optimal conditions. Network speeds vary depending on user's location and hardware. Actual coverage may vary depending upon customer equipment, antenna placement, topographic and weather conditions. 4G Network available with HSPA enabled device and SIM card. MTS design mark is a registered trademark of Manitoba Telecom Services Inc., used under license.

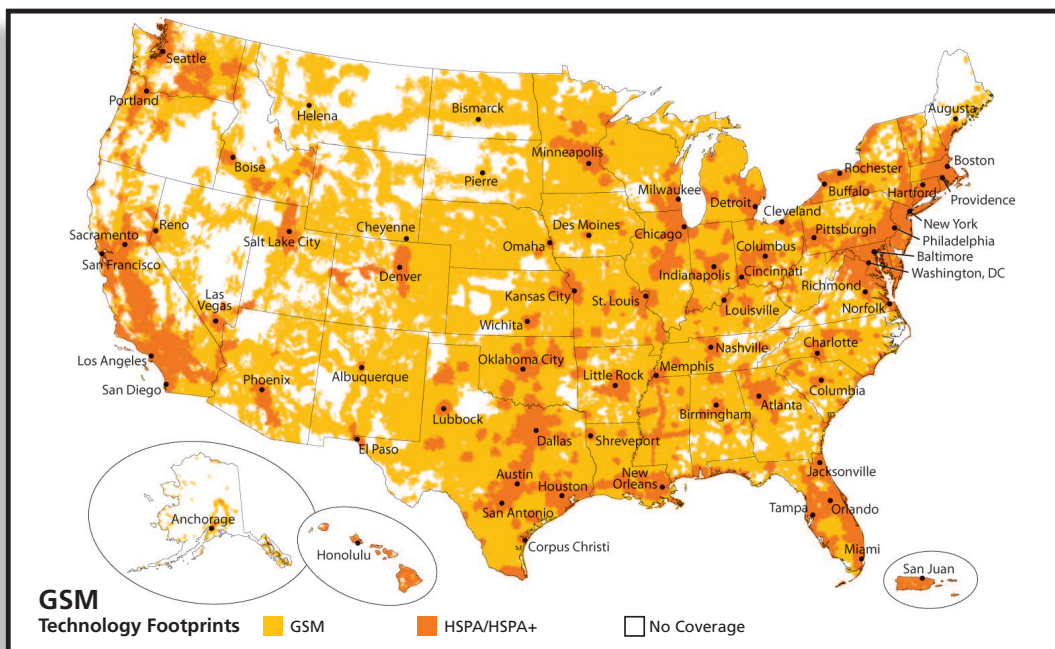

# Coverage wherever your travels take you!

## Coverage across Canada

When travelling across Canada, your plan travels with you (unless otherwise noted).  
You can enjoy the same great rates as you do in Manitoba.

## Roaming across the U.S.

Please remember that you will generate additional charges when using your phone outside of Canada.

## Enhanced International Roaming

### Roaming in over 200 countries worldwide

Internationally, the new network offers 6X the number of countries as our CDMA network, which means that your phone will work in more places than ever before. Because we continue to expand our international coverage, we recommend that you visit [mts.ca/hsparoaming](http://mts.ca/hsparoaming) for the most up-to-date information.
